DATA Q4 2026 ANALYSIS

Key insight

Product views are increasing

Wishlist activity is decent

Add-to-cart and purchases are **very low**

Major drop-off happens before checkout

	Oct	Nov	Dec
Unique product viewed	60	80	90
New product on wishlist	15	20	18
Added to cart	3	4	3
Purchased product	1	2	2

Assumption:

1. User's wishlist is higher than the cart, because the **items are unavailable, or low wishlist awareness.**

2. User forget to complete purchases on cart or wishlist because there are **no notifications** when products are back on stock or on discount and **no urgency** to purchase.

3. Wishlist **feature** is hidden. **Not easy to find**, not as easy as cart feature.

4. Wishlist **feature's not simplified** enough to urge user to purchase.

How to improve **Cart** & **Wishlist** to purchase conversion

Priority Actions for Q1 2027:

1. Optimize check-out experience
(Simplify check-out flow, made feature more visible and engaging)
2. Increase engagement
(Voucher & discounts campaign made visible)

Final recommendation

Solutions:

1. Add wishlist feature on Homepage
2. Add check-out feature on wishlist page (no more going back to cart, user can directly purchased)
3. Limited-time countdown voucher special for back-on-stock products and with other discounted items on cart & wishlist
4. On app & Push notification:
 - a. Cart & Wishlist on app indicator for products that are “Almost out-of-stock”, “Only 1 Left”, “back-on-stock”, “soon, back-on-stock” with product viewed to increase user engagement and create urgency to purchase (Linked to product page)
 - b. Cart & Wishlist on app indicator for products that are “FLASH SALE” with product viewed to increase user engagement and create urgency to purchase (Linked to product page) + view limited-time countdown
 - c. Push notification for limited-time countdown voucher with product viewed (Linked to product page) – *Optional, depend on budget and further research*

Expected Impact:

Optimize user experience

Create urgency to user
(Increase conversion)

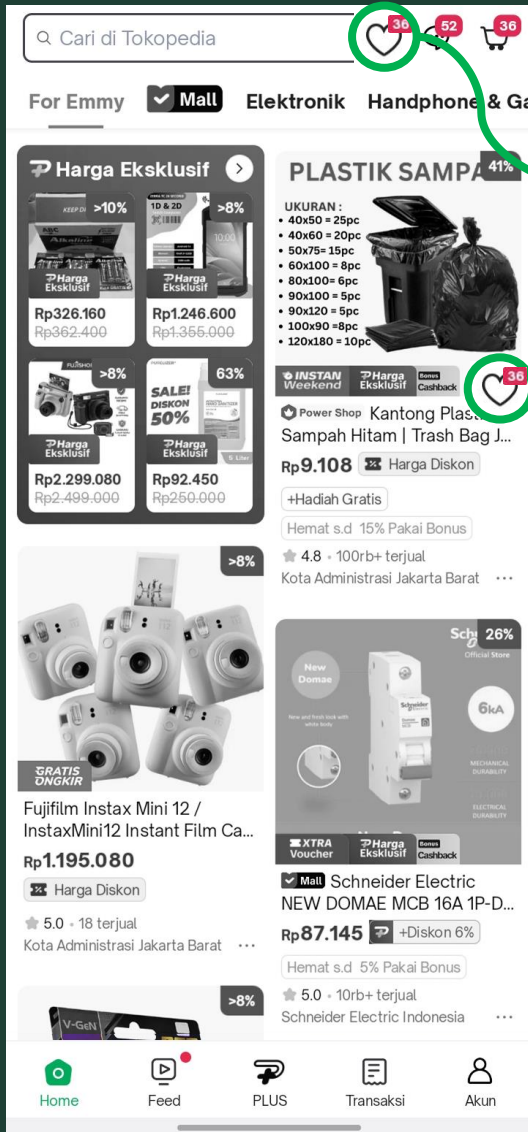

Encourage add-to-cart &
wishlist actions

Higher & faster purchase
conversion (By provide
urgency)

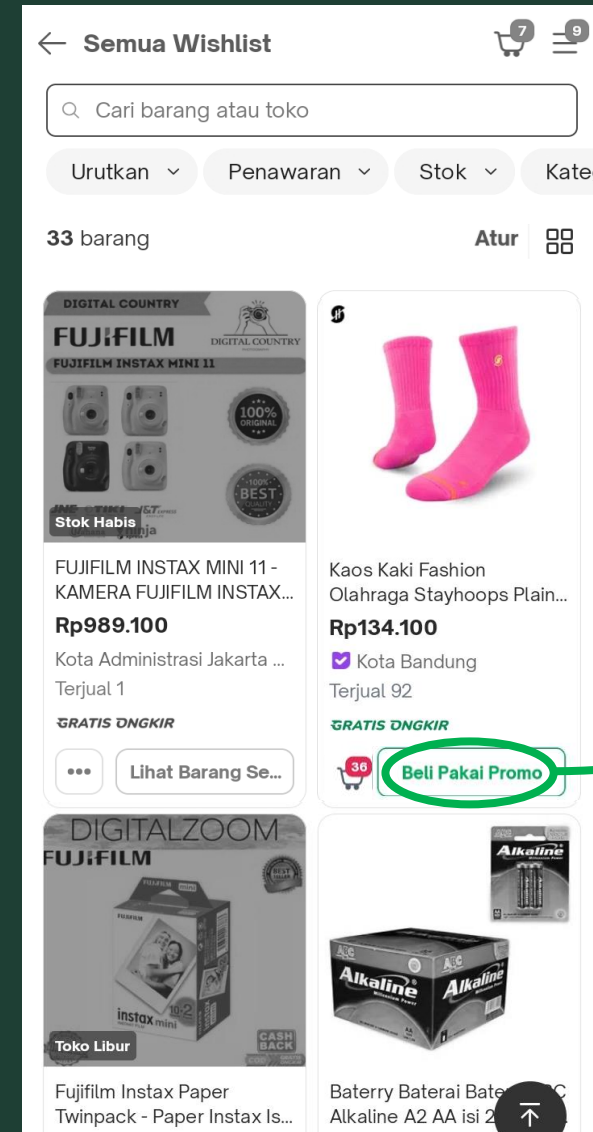

Final recommendation

Wishlist feature

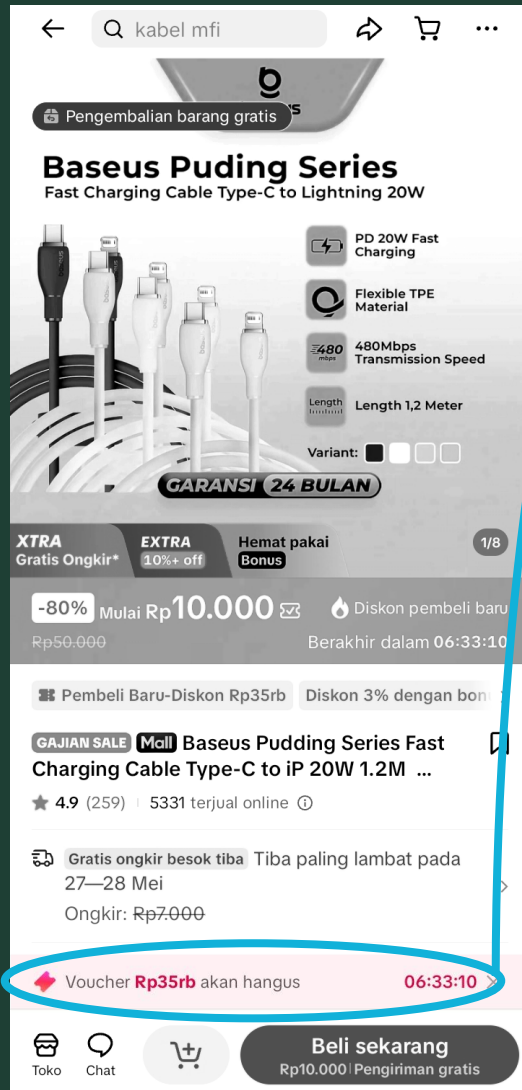

Boost visibility:

1. Float on screen
2. Icon along with Cart, Message feature

Add check-out button on Wishlist page

Final recommendation

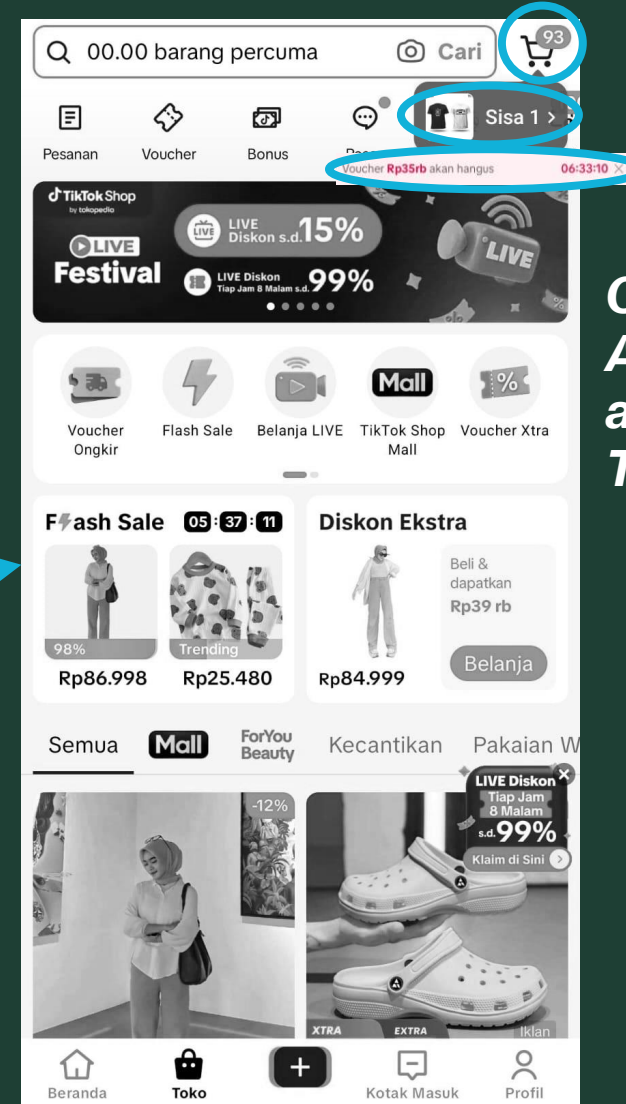

On app reminder

Products from Cart & Wishlist:
